Summary

I am a software engineer who is presently enrolled in Vistula University in Poland to study computer science. I have a strong love for software development and am seeking for a company to which I can contribute.

Experience

Software Engineer Intern

Itransition Group

Jun 2022 - Jul 2022 (2 months)

I completed the six activities and final course project that were given to me by my supervisors throughout the internship.

- Two of the assignments included algorithmic questions.
- The remaining assignments and the final project both involved full-stack web apps.

I used JavaScript, React, MongoDB, Node, and Express to create websites.

Education

Vistula University

Bachelor of Engineering - BE, Computer Science

2019 – 2023

Projects

Amazon Clone

The application has everything that regular e-commerce application has. It includes authentication, products, checkout, payment system and very similar design to actual amazon website.
